

VIBIN D

Phone : +91 8608322120 | **E-mail :** vibind007@gmail.com

Address : 653, Telugu Street, Coimbatore - 641001

LinkedIn : www.linkedin.com/in/vibin-d-61b26932a | **Github :** <https://github.com/Vibin-007>

Objective

AI & Data Science graduate with foundational knowledge in Machine Learning and hands-on experience in Python, data analysis, and web development. Familiar with building and evaluating ML models and eager to apply data-driven solutions to real-world problems.

Education

Bachelor of Science (AI & DS) | Rathinam College of Arts and Science | 2024 - 2027 | 8.08 CGPA

HSC | Devanga Hr Sec School | 2022 - 2024 | 69%

SSLC | Sri Visweswara Vidyalaya Matric Hr Sec School | 2021 - 2022 | 70%

Skills

Technical Skills :

- HTML,CSS,JS
- Python
- Java
- Postgres

Soft Skills :

- Problem Solving
 - Quick Learner & Adaptable
 - Collaboration
 - Time Management
-

Projects

College Event Management System

Tech Stack: HTML, CSS, JavaScript, Django, PostgreSQL

- Built a scalable web platform using HTML, CSS, JavaScript, Django, and PostgreSQL for multi-category event registrations.
- Implemented secure authentication, dynamic workflows, and real-time event management dashboard.
- Improved operational efficiency by digitizing registrations and reducing manual coordination overhead.

Data Science Project – ML Web Application

Tech Stack: Python, Streamlit, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Built an end-to-end Streamlit application integrating regression, classification, and clustering models for real-world datasets.
 - Implemented algorithms like Linear Regression, Random Forest, KNN, Naive Bayes, K-Means, and DBSCAN with performance metrics (Accuracy, R^2 , RMSE).
 - Delivered interactive dashboards and visual insights (PCA plots, confusion matrix) to enable data-driven decision-making.
-

Workshop

Mastering Generative AI – IISc Bangalore (March 2025): Gained hands-on experience with generative AI models and real-world applications across text, image, and data generation.

Tools : Python, TensorFlow, Prompt Engineering, Tik Tokenizer.

Introduction to Machine Learning – IIT Palakkad (September 2025) : Acquired foundational knowledge of supervised and unsupervised learning, model evaluation, and optimization techniques.

Tools : Python, NumPy, Pandas.

Certificates

- AI Fundamentals - Google
- Programming with JavaScript - Meta
